Questions, problems, missing parts? Before returning to your retailer, call our customer service department at 1-800-414-3434, 9 a.m. - 5 p.m., EST, Monday-Friday.
Thank you for purchasing this SYLVANIA™ Staylit™ Pre-lighted Tree. This tree assembles in minutes and is decorated with UL listed SYLVANIA™ Staylit™ miniature light sets. Please note this tree also comes with an on/off foot pedal switch for easy illumination.

This product carries a 3 year limited guarantee. This guarantee does not cover damage resulting from accident, misuse, abuse, negligence, or normal wear and any discoloration. To register for the limited guarantee you must complete and return the enclosed registration card or register online at www.inliten.com within thirty days of purchase.

Extremely Important: Please retain your Lowe’s sales receipt as proof of purchase. Receipt is required for warranty service. Please note this warranty is non-transferable and is good only for the original purchaser of this tree. This warranty does not apply if tree is purchased from a source other than Lowe’s.

In the unlikely event that you experience problems with the tree please call our customer service hotline at (800) 414-3434.

Please provide the 7-digit product ID number of the tree as well as information pertaining to the nature and description of the problem. The product ID number can be located on the pole of the bottom section. Please have this number available before you call.

**IMPORTANT SAFETY INFORMATION**

**WARNING**

• Always unplug your tree from its power source before attempting either fuse or bulb replacement.

**CAUTION**

• Inspect product carefully before using or re-using.
• This is an electrical product – not a toy! To avoid risk of fire, burns, personal injury and electrical shock it should not be played with.
• Do not mount or place near gas or electric heaters, fireplaces, candles or other similar sources of heat.
• Do not cover product with cloth, paper or any material when product is in use.
• Do not hang ornaments or other objects from cord, wire, or light string. Hang ornaments only on the tree itself.
• For your safety, unplug the product when leaving the house, retiring for the night, or if left unattended.
• Do not let bulbs rest on the supply cord or on any wire.
• Do not close doors or windows on the product or extension cords as this may damage the wire insulation.
• Do not remove tape placed over mounted electrical outlet sockets. Any outlet you need to plug into is not wrapped in tape. Only remove tape when inspecting fuses (see Trouble Shooting section).
• Should you discover any of the following: a) cut, damaged, or frayed wire insulation; b) cracks in the sockets; c) loose connections or exposed wires, please call the toll free number (800) 414-3434.

FOR INDOOR USE ONLY
PREPARATION

Remove plastic protective covers from the base of the pole from each section.

Estimated Assembly Time: 20 minutes

ASSEMBLY

1. Before you start to assemble your tree please choose a location near an electrical wall outlet. Assemble the tree stand according to the assembly instructions provided with the stand. Place the tree stand on a level surface.

2. Carefully insert bottom section (D) of tree into stand. Make sure pole is firmly inserted into stand and tree stand screws are tightened.

3. Insert lower middle section (C) of tree into bottom section (D). Extension cord from section (C) should run down through section (D) and toward wall outlet. DO NOT PLUG INTO WALL OUTLET UNTIL ASSEMBLY IS COMPLETE!

⚠️ IMPORTANT: Do not remove the tape wrapped around the outlets of the light set cords. The outlet you need to plug into is not wrapped in tape and is clearly labeled. Only remove tape when inspecting fuses (see Trouble Shooting section). There is a yellow tag attached to the extension cord to help locate the outlet on the cord to insert the plug.
4. Insert upper middle section (B) into lower middle section (C). Locate the light set plug labeled #2 from section (B) and connect to the outlet labeled #2 mounted in section (C). Locate light set plug labeled #3 from section (B) and insert into back of plug labeled #3 located in section (C). 
*Note: Plug #3 in section (C) comes from the factory already plugged into outlet mounted in section (C).*

5. Insert top section (A) into upper middle section (B). Locate light set plug labeled #1 from section (A) and connect to outlet labeled #1 mounted in section (B).
6. Locate light set plug labeled #4 from section (D) and connect to outlet labeled #4 mounted in section (C). Locate plug end of long extension cord hanging down through section (D) and plug into wall outlet. Note that this tree comes with an ON/OFF foot pedal switch for convenience.

7. Gently pull all branches down and into place. When adjusting branches be sure that all wires are free of branch hinges.

8. Shape the branches. Starting with tips closest to the pole, shape one tip to the right, one to the left and one at the center of the main stem. Repeat pattern for each branch.

TROUBLE SHOOTING

- If entire tree does not light, make sure extension cord plug is securely inserted into a working electrical outlet.
- If an entire section of the tree does not light:
  a) check to be sure that all plugs within the tree are securely connected.
  b) check fuse in the extension cord and replace if necessary (please note that the 5-Amp extension cord fuse is different than the 3-Amp fuse used in the mini light sets).
- If you are still experiencing problems with the tree please call 1-800-414-3434 for instructions.

CAUTION! – ALWAYS UNPLUG YOUR TREE FROM ITS POWER SOURCE BEFORE ATTEMPTING EITHER FUSE OR BULB REPLACEMENT.

FUSE REPLACEMENT:
This product comes with overload protection (fuse). A blown fuse indicates an overload or short circuit. If a fuse blows, unplug tree from wall outlet. Replace the fuse per the fuse replacement instructions below (follow product marking for proper fuse rating). If the replacement fuse blows,a short circuit may be present and the product should be reviewed to determine the cause.

A) Extension cord fuse replacement (1 replaceable 5-amp 125V fuse is located in the plug):
1. Grasp plug and remove from its power source.
2. Locate blown fuse by sliding access cover on top of plug towards prongs.
3. Remove blown fuse by turning the plug over. Fuses should fall into your hand (gentle tapping may be required).
4. Locate spare replacement fuse inside plug.
5. Insert new fuse. Close fuse cover by sliding fuse access cover towards the cord.

CAUTION: To reduce risk of fire – replace fuse in extension cord with only 5-amp 125 volt fuse. Do not replace attachment plug. Discard product if the attachment plug is damaged.
FUSE REPLACEMENT (continued):
B) Light set fuse replacement (2 replaceable 3-amp 125V fuses are located in plug)
1. Grasp plug and remove from its power source.
2. Locate blown fuse(s) by sliding access cover on top of plug towards prongs.
3. Remove blown fuse by turning the plug over. Fuses should fall into your hand (gentle tapping may be required).
4. Locate spare fuses in plastic bag.
5. Insert new fuses. Close fuse cover by sliding fuse access cover towards the cord.

CAUTION: To reduce risk of fire – replace fuse in extension cord with only 3-amp 125 volt fuse.
Do not replace attachment plug. Discard product if the attachment plug is damaged.

BULB REPLACEMENT:
1. Grasp plug and remove from its power source.
2. Pull bulb AND plastic base straight out of socket. Do not twist bulbs.
3. Replace burned out bulb with 3.5 volt bulb ONLY (additional bulbs are included).

IF PLUG DOES NOT FIT: This product contains an extension cord with a polarized plug (one prong is wider than the other) as a feature to reduce the risk of electrical shock. This plug will fit in a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not use with an extension cord unless the plug can be fully inserted. Do not alter or replace the plug.

FOR INDOOR USE ONLY.

STORAGE: Disassembled tree can be stored in its original box. Store tree in a cool dry place where the temperature does not exceed 100 degrees Fahrenheit.
